

MotionPlay progress report

Player: demo
Period: Demo data (invented) | Rounds from 2026-09-02 22:06 to 2026-10-06 09:32
Generated 2026-10-06 18:00

Gameplay measurements from a prototype game. This is not a medical device or therapy tool, and these numbers are not a basis for health conclusions.

Summary

Measure	Value
Rounds played	42
Flowers watered	274 of 336
Overall accuracy	82%
Best streak in a round	8
Total play time	24 min 32 s
Average reaction time	0.72 s
Average movement time	1.28 s
Average hold stability	76%
Average path efficiency	65%

Progress: earlier rounds compared with later rounds

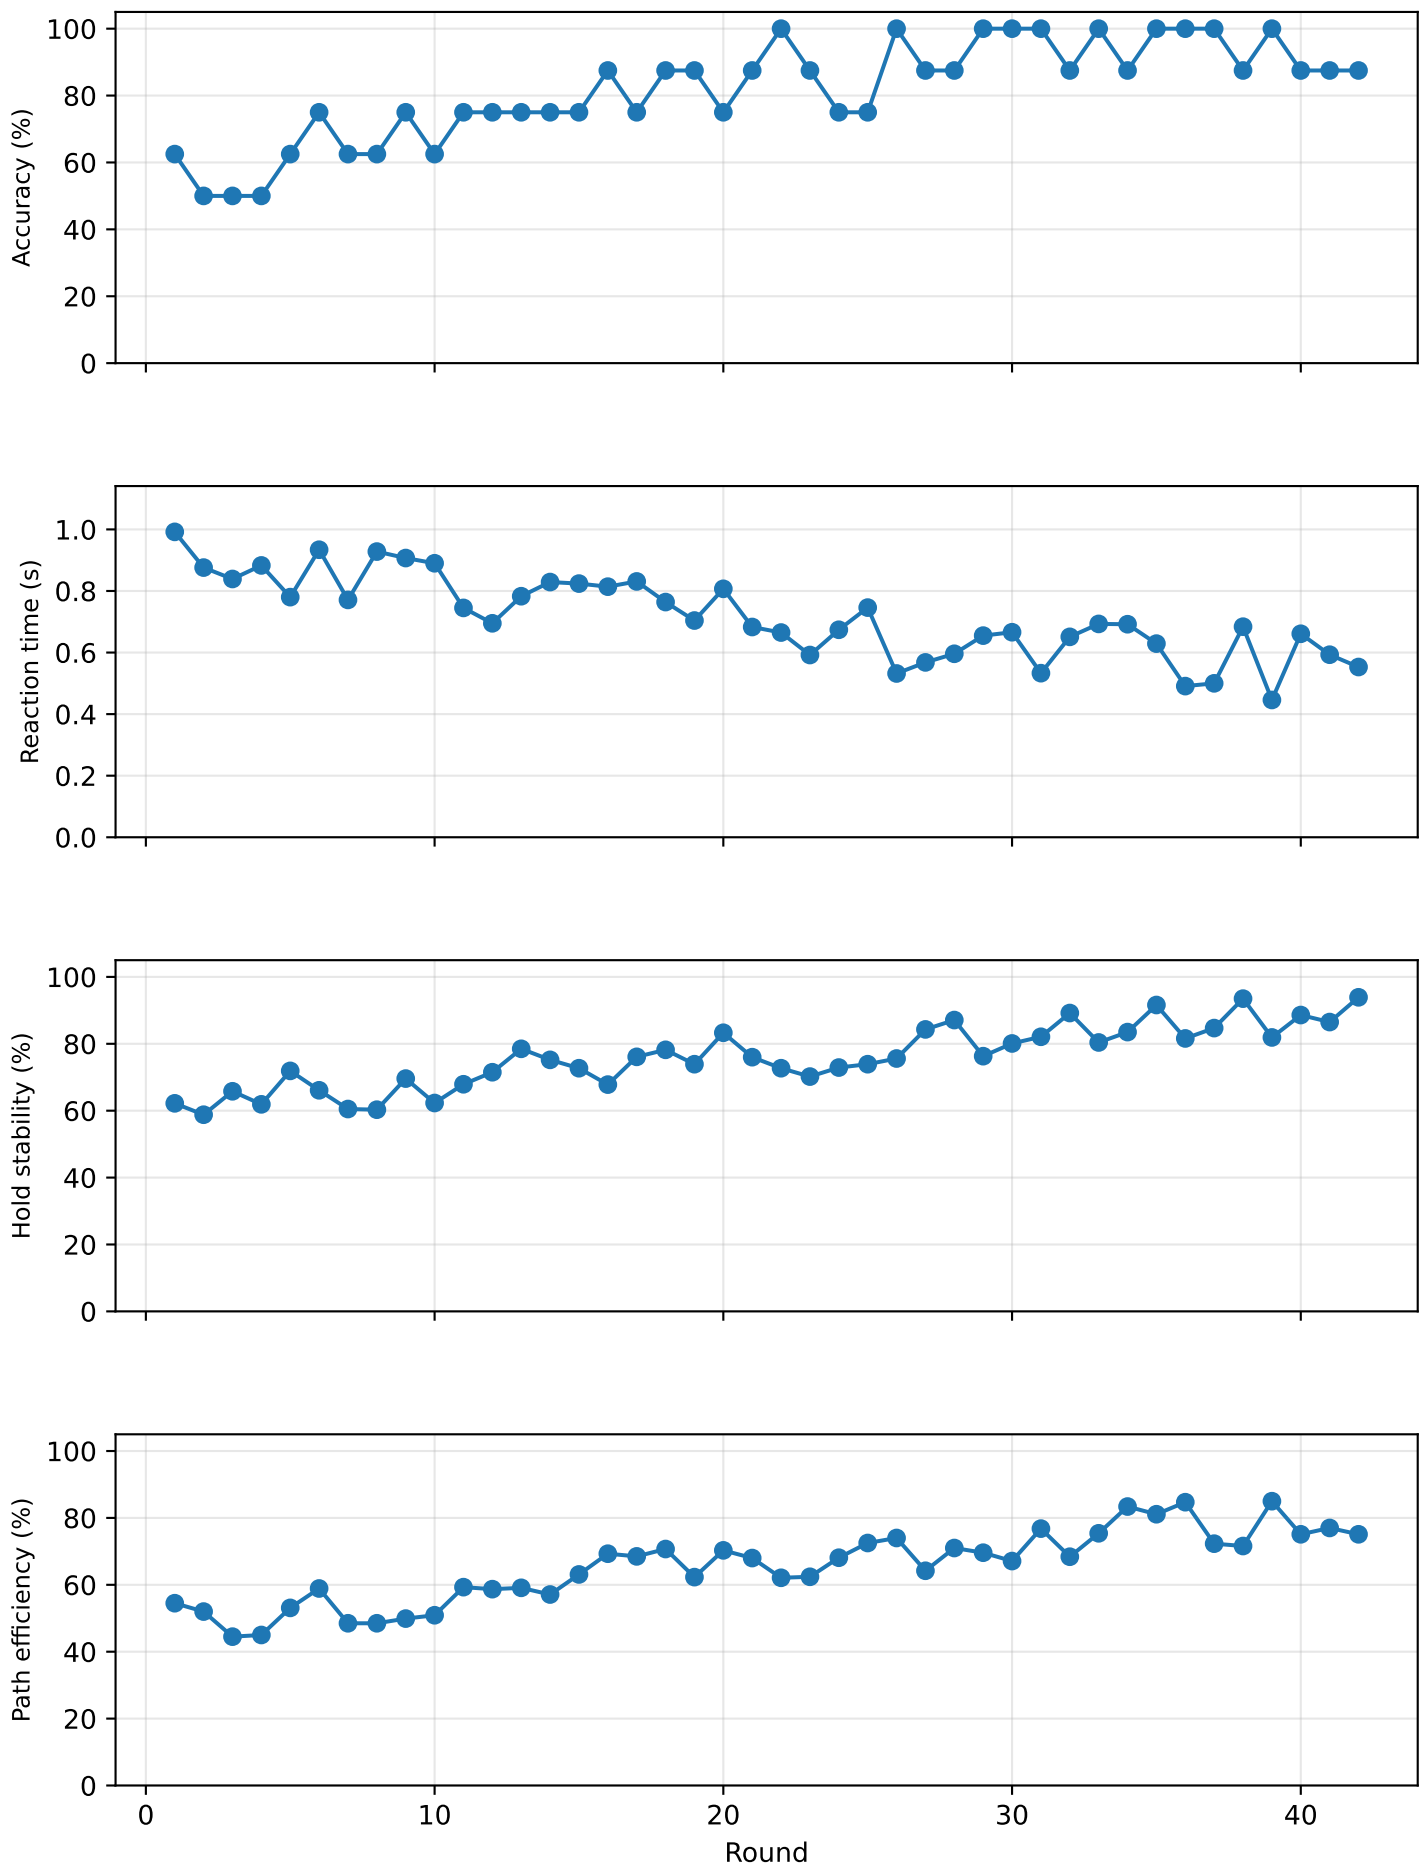

Earlier = the first 21 round(s); later = the other 21. A measure counts as changed only past a small margin.

Measure	Earlier	Later	Change	Result
Accuracy	71%	92%	+21 pts	improved
Reaction time	0.82 s	0.61 s	-0.21 s	improved
Hold stability	70%	82%	+13 pts	improved
Path efficiency	58%	73%	+15 pts	improved

With few rounds, a difference can come from luck, tiredness, or lighting as easily as from practice.

These rounds were played at different difficulty levels (see the Level column), so earlier and later rounds are not like for like: a higher level is harder, which can lower accuracy even when play improves.

Trends by round (oldest to newest)

A gap means the round had no value for that measure (for example, no flower was watered).

Rounds, newest first
